ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: MODULAR CONVEYOR MAT

(57) Abstract: A conveyor belt (1), comprising a number of plastic modules (3) successive in conveying direction (2) which are each provided at a front and rear side (4, 7) with a row of projections (5, 8) extending transversely to the conveying direction (2), provided with hinge holes with recesses (6, 9) located therebetween, the projections (5, 8) cooperating with recesses (6, 9) of adjoining modules, while hinge loops of successive modules (3) are coupled with the aid of hinge pins, extending through the hinge holes, transversely to the transport direction (2), the hinge pins being included with clearance in oversized hinge holes of projections (5, 8) at the front and/or the rear side (4, 7). At least two successive modules (3) are interconnected via an intermediate element (12) borne on a hinge pin (11A) and bearing mounted so as to be pivotal relative to a pivot (A) substantially transverse to the hinge pin (11A) in a bearing opening formed in one of the modules (3).
